

WEBSITE DESIGN BRIEF

APSIC Environmental Hygiene Excellence Award (AEHEA)

Homepage concept exploration → full design → Webflow build

Prepared by	Unsensible
For	Elux (design & build agency)
Project	AEHEA Website — design (Figma) + build (Webflow)
Client	APSIC (programme owner) · Schülke (cooperation partner)
Date	29 June 2026

1. Project Overview

The APSIC Environmental Hygiene Excellence Award (AEHEA) is a regional platform that identifies, recognises, honours, and celebrates hospitals and healthcare teams across the Asia Pacific that demonstrate excellence in environmental hygiene and patient safety. The award is scientifically led and independently governed by APSIC, and delivered in cooperation with Schülke, the exclusive partner for holistic Infection Prevention and Control (IPC) solutions.

This engagement covers the design and Webflow build of the official AEHEA website. Elux will first present three homepage concept directions; we select one, Elux then designs all remaining pages in the chosen direction and builds the live site on Webflow.

Primary objective: Signal prestige and credibility. The site's first job is to convey scientific authority and a premium, trustworthy presence so the award is taken seriously across the region. Driving hospital applications is the important secondary goal.

2. Strategic Context

- **Audience:** Hospitals, IPC specialists and quality leads across Asia Pacific (English-speaking professional audience).
- **Tone:** Scientific authority meets premium, clean, clinical design.
- **Governance:** APSIC scientifically leads and independently governs the award. The design and copy must reflect APSIC leadership at all times; Schülke appears as a cooperation partner, never as the owner or judge of the programme.

3. The Core Creative Task — Three Visual Directions

Please develop three distinct homepage concept directions. The directions are differentiated by their level of association with the Schülke brand — from a largely neutral, clinical look with

restrained blue accents, through a strongly Schülke-branded treatment, to a completely fresh AEHEA-owned identity. All three are genuinely open; we will choose after reviewing the concepts.

	Direction 1 Grey / White + Blue	Direction 2 Schülke Blue	Direction 3 New Blue-Purple
Association with Schülke	Low – moderate	High (strongest tie)	None / own identity
Palette	Mostly light grey & white; Schülke blue used as a restrained accent only.	Schülke blue (#007CC2) leads, supported by halftone gradations (40 / 20 / 10%) and neutrals.	A fresh, AEHEA-owned blue-purple palette. Free to move away from Schülke blue entirely.
Brand devices	Subtle cues only — e.g. rounded corners. No Schülke arrow or halftone.	Use Schülke's signature assets: the 'schülke plus' arrow device + halftone blue gradations.	Subtle cues only (rounded corners). No Schülke devices.
Reference feel	Clean, clinical, scientific-minimal (light biotech / lab studio aesthetic).	Confident, editorial, institutional blue (authoritative medical-institution feel).	Premium, modern, slightly futuristic (refined AI / genomics aesthetic).
Header font (Google)	Clean grotesque sans.	Strong, institutional sans.	A serif or distinctive display face — to give the set its range.

Visual reference screenshots for each direction are shared separately.

4. Brand & Co-Branding Rules

- **APSIC / AEHEA brands the site throughout.** The award identity leads on every page.
- **Logo co-branding is limited.** The APSIC and Schülke logos appear together only in the “Partners in safer care, led by APSIC” cooperation-partner section (Leadership & Process page). Schülke’s dedicated home is the Cooperation Partner feature on the Winners & Partners page.
- **Schülke graphic assets are for Direction 2 only.** The “schülke plus” arrow device and halftone blue gradations are used only in the Schülke-blue direction. Directions 1 and 3 use subtle cues such as rounded corners instead.
- **Scientific independence is non-negotiable.** Nothing in the design or copy may imply that Schülke influences judging or evaluation.

Schülke blue reference (for use in Directions 1 & 2): Pantone 3005 C · #007CC2 · halftones at 40 / 20 / 10%. Neutrals: grey #AFAFAF, dark grey #636362, plus white and black.

5. Typography

- **Body copy:** Open Sans across all three directions.

- **Headers:** A Google font, varied per direction to give the set a range of looks — mixing sans-serif and serif (e.g. sans for Directions 1 & 2, a serif/display face for Direction 3). Please propose specific faces with each concept.

6. Imagery

Elux to source imagery. We want clean, minimalist, studio-quality representations of modern medical and clinical environments that showcase advanced environmental hygiene — calm, premium, and free of visual clutter. Imagery should be tailored to suit each direction.

7. Content & Structure (Approved — Follow Exactly)

The sitemap, page structure, copy and user flow are approved. The three directions change the look and feel only — not the structure or content. Build to the approved wireframe and supplied copy.

Page	Key sections (per approved wireframe & copy)
1 — Home / Landing	– Hero: “Be Recognised. Save Lives.” + Apply Now CTA – About AEHEA + three contribution pillars (Commitment to IPC, Innovative practices, Quality of care) – Joint message from Award Programme Chair (A/Prof. Moi Lin) & APSIC President (Prof. Anucha Apisarnthanarak) – “Why Join” benefits (Be Recognised / Save Lives); quick links; footer
2 — Leadership & Process	– Programme leadership (Prof. Ling Moi Lin) & APSIC Expert Panel – 3-stage evaluation process; assessment criteria – Nature of the award (prestige, not a monetary prize) + recognition at APSIC Congress – “Partners in safer care, led by APSIC” — co-branding section (see Brand Rules)
3 — Winners & Partners	– Winners placeholder: “To be announced at APSIC 2028” (CMS-managed) – Expert Panel profile grid – Cooperation Partner feature — dedicated Schülke section
4 — How to Participate	– Interactive timeline / step-by-step UI for the 8-step application flow – Key notes: free of charge, scientifically independent, confidential – Apply Now CTA
5 — Apply Now	– Expression of Interest form (hospital details, IPC/Quality Lead contact, confirmation) – Validation + document upload; data-confidentiality reassurance
6 — FAQ & Contact	– Accordion FAQ (9 core questions) – Contact form + inquiries (email, phone, office, map)
Legal	– Privacy Policy, Terms of Use, Conditions of Participation (standard pages)

Interactive feature — the 8-step application flow

The “How to Participate” page must present the application process as an interactive timeline / step-by-step UI, working cleanly on mobile:

1. Register Your Interest
2. Review APSIC Guidelines & Audit Framework
3. Complete Self-Assessment
4. Submit Application
5. Shortlisting by APSIC Expert Panel
6. Participate in Educational Support Activities
7. Final On-Site Assessment
8. Award Recognition

8. Deliverables & Phasing

Phase 1 — Concepts (due end of Thursday 2 July 2026). Three homepage (landing page) concepts in Figma, one per visual direction.

Phase 2 — Full design. We select one direction; Elux designs all remaining pages in that direction (Figma).

Phase 3 — Build. Develop the site on Webflow — fully responsive across desktop, tablet and mobile, on an easy-to-update CMS so winners can be announced at APSIC 2028.

- **Language:** English only.

9. Mandatory Requirements

- Follow the approved wireframe structure and sitemap — directions change the look, never the structure.
- Follow the approved copy and user flow exactly.
- “Apply Now” must be present in the navigation and recur as a CTA throughout.
- Fully responsive — the 8-step flow must work cleanly on mobile.
- Maintain APSIC's scientific independence in tone and hierarchy.
- CMS-ready so the client can publish winners at APSIC 2028.

10. Assets Provided

- APSIC / AEHEA logo and Schülke logo.
- Schülke brand guidelines (colour system, the 'schülke plus' arrow device, halftone gradations).
- Approved wireframe (PDF) and approved website copy.
- Visual reference screenshots for the three directions (shared separately).
